

Standardizing surgical excellence in hospitals

Qvident, by caresyntax, is a web-based surgical data workspace that helps surgeons analyze and leverage their recorded surgical content

How qvident® can support your hospitals

Simplify post-op reporting and quality management within one integrated dashboard

Analyze OR performance with synchronized video, case data review, and customizable efficiency metrics

Assess surgical skills and accelerate learning with data-enabled surgical training and coaching

Surgical Training and Coaching App

Time Saving Standardized Reporting & OR Analytics Tools

OSATS Evaluation of Surgical Skills & Performance

Easy-to-use interface and Vendor-Neutral

Certified ISO 9001 : 2015

Protected Data with Secure Encryption

Take control of your OR with data-enabled tools to make surgery smarter and safer

qvident®: overview and features

Coaching and training app to review, analyze, and evaluate surgical performance with standardized assessment protocols (OSATS, NOTSS, etc.)

Event reporting tool, to quickly log and categorize surgical events, embedded within the qvident dashboard

Daily, web-based dashboard overview: customizable by surgeon or department head

Key OR performance metrics, customizable by focus metric and time range

Accessible and responsive for any device: mobile, tablet, or PC

Accelerate surgical improvement

Save time with web-based surgical coaching, which can be easily accessed from anywhere

Maintain consistent and effective surgical performance reviews with secure user management
